

Masterbatch container

You know the problem?

The appropriate storage of different masterbatches is often a challenge. The bags get dirty, have holes or can't be found, material is useless through spillage, the handling is circumstantial.

The masterbatch container is exactly the right thing for your individual storage system and you will highly benefit from its use – next to the easy handling and the robust construction.

We have the solution!

With our newly invented masterbatch container you are able to solve all these problems in one go! A quick and trouble-free withdrawal is possible any time.

Due to the unique technique you can arrange and fasten the containers as you wish. To integrate this unique system into your existing storage system is no problem.

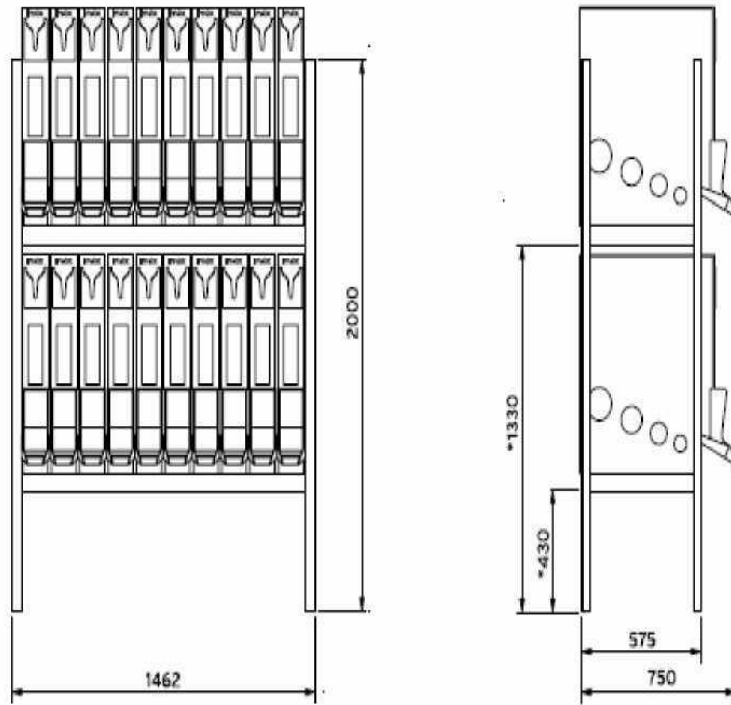

Advantages

- Fills up easily from the top
- Easy withdrawal and dosage
- Uncomplicated handling

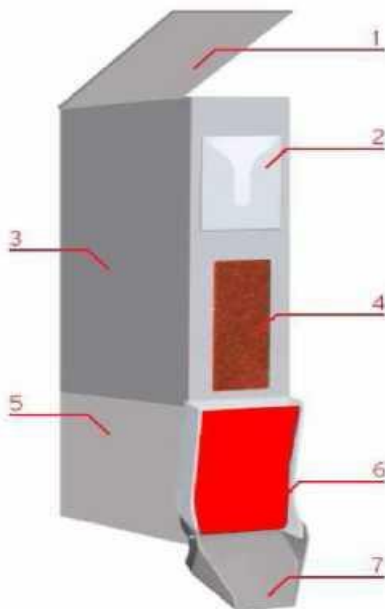

Technical details:

Height:	790 mm
Width:	118 mm
Depth:	650 mm
Filling weight:	25 kg

Adjustable in 25mm raster

Dimensions for a storage rack with 20 masterbatch containers

1. Lid: Protection against dirt
2. Datasheet: Slipcase for individual marking
3. Masterbatch container: for 25 kg material
4. Viewing window: Insight of the contents
5. Pull out: A comfortable solution for trouble-free refilling
6. Dosing flap: Easy to regulate with light pressure
7. Chute: for clean withdrawal of the masterbatches
